ANNEXURE V

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

[Pursuant to Regulation 34 read with the Schedule V of Securities and Exchange Board of India Listing Obligations and Disclosure Requirements) Regulations, 2015]

The Management of the Company is pleased to present its report on Industry Scenario including Company performance during the financial year 2018-19.

ECONOMIC OVERVIEW

India's economy has been the fastest growing major economy in the world and is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships. The growth rate of India's Gross Domestic Product (GDP) fell from 7.2 per cent in Financial Year 2017-18 to 6.8 per cent in FY 2018-19, due to poor performance in agriculture and manufacturing sectors India moved up by 23 places in the World Bank's Ease of Doing Business Index 2018 and achieved 77th rank. Fixed Investment Rate (Share of GFCF to GDP) stood at 28.9 per cent during FY19, compared to 28.6 per cent during the corresponding period of FY18.

The Government of India has introduced several reforms to liberalise, regulate and enhance this industry. The Government and Reserve Bank of India (RBI) have taken various measures to facilitate easy access to finance for Micro, Small and Medium Enterprises (MSMEs).

Nominal Repo Rate stood at 6.25 per cent as of February 6, 2019, compared to 6.00 per cent as of February 16, 2018. Bank credit grew 14.5 per cent year-on-year as on February 1, 2019, compared to 10.7 per cent year-on-year as on April 12, 2018. The Government has ease the norms of foreign investment which has resulted into a positive era for the foreign investors, increasing their stakes in joint ventures with Indian Companies. Investments by Foreign Portfolio Investors (FPIs) in Indian capital markets have reached Rs 5,400 crore (US\$ 748.44 million) up to December 30, 2018.

INDUSTRY OVERVIEW

Non-Banking Financial Companies (hereinafter to be referred as "the NBFCs") have been under liquidity pressure after the shock default by Infrastructure Leasing & Financial Services (IL&FS) in September, 2018. NBFCs has been growing robustly in recent years, providing an alternative source of funds to the commercial sector in the face of slowing bank credit. The profitability of NBFCs improved on the back of fund-based income, low NPA levels relative to banks and strong capital buffers.

As per the Financial Stability Report dated 31st December, 2018 released by Reserve Bank of India, NBFCs have outperformed Scheduled Commercial Banks (SCBs) on growth in advances, asset quality and profitability. NBFCs have brought the sector under greater market discipline. NBFCs are expected to grow and to increase their share in the market in near future.

- **MSME Sector**

Micro, small and medium enterprises (MSMEs) is the backbone of the national economic structure. There are more than 63 million MSMEs in India which account for 45% of industrial production, 30.5% of services sector and provide employment close to 110 million people. MSMEs contribute around 6.11% of the manufacturing GDP and 24.63% of the GDP from service activities as well as 33.4% of India's manufacturing output and contribute around 45% of the overall exports. The Government of India has been taking several initiatives for facilitating the growth of MSME sector yet lack of access to financial resource is a major concern for MSMEs. The gap between the total addressable demand for external credit and overall supply of finance is huge. According to the estimates, the credit gap could increase even higher in upcoming years. The Government in Union Budget 2019 unveiled a slew of initiatives and new provisions to tackle issues related to the MSME sector in the country. **"Make in India"** with particular emphasis on Micro, Small & Medium Enterprises, was one of the major focus areas of the Union Budget 2019.

- **Housing Finance**

According to the reports of ICRA, tight liquidity conditions since September 2018 has pushed housing finance companies (HFCs) to lower their disbursements and meet a sizable portion of their fund requirement through portfolio sell-down route. Housing loan portfolio growth for HFCs and NBFCs has reduced to 13 per cent year-on-year as on December 31, 2018 as compared to 18 per cent year on year as on December 31, 2017. However, given the positive long-term prospects for the sector, ICRA expects housing credit growth for FY2020 to be pegged at 14-16 per cent, provided the liquidity conditions in the market ease out.
